My portfolio (Neuraldv)

Summary

Dynamic professional with experience as a Student Coordinator at Corizo, enhancing student engagement through innovative programs. Proven leadership and problem-solving skills, complemented by expertise in AI from my internship at Suvidha Foundation, where I implemented machine learning models to drive decision-making and improve user experience. Demonstrated success in helping students take advantage of programs and acclimate to school-level life. Gifted in developing and leading diverse programs with a systematic and tenacious approach to accomplishing targets.

Professional Experience

04/2026 – 05/2026
Remote

Suvidha Foundation
Ai Intern

- *Implemented machine learning models for predictive analytics, enabling better decision-making and forecasting capabilities.*
- *Ensured proper documentation of all work processes that helped create a knowledge base resourceful for future interns and team members.*

03/2026 – 04/2026
Remote

Corizo
Student Coordinator

- *Enhanced student experience by organizing and coordinating engaging events and programs.*
- *Informed students and staff regarding campus organizations, events and available department opportunities.*
- *Provided timely assistance to students experiencing challenges or difficulties in their* academic or personal lives.

Skills

- HTML5
- JavaScript
- CSS
- Python
- REACT
- NODE
- RUST
- MongoDB
- PowerBI
- Express
- Public speaking
- Business Analysis
- Team Management
- Java
- C#

Languages

English

Hindi

Courses

08/2026 – 09/2026

AI/ML
Apna college
Learner Artificiall Intelligence and Machine learning from Apna College,Made projects and used it in daily life too.Learned python required for AI too.

01/2026 – 09/2026 **FULLSTACK Development**
Online Apna College
I learned complete Mern stack with HTML,JS,CSS in 8 months.

Projects

Personal Portfolio
Modern Developer Portfolio with Aesthetic UI
Designed and developed a fully responsive personal portfolio website with a modern, aesthetic UI. The portfolio showcases projects, skills, and contact functionality with smooth animations and clean layout inspired by modern developer dashboards.
Key Features:
- Responsive design for all devices
- Smooth scroll animations
- Projects showcase section
- Contact form integration
- Clean white & blue themed UI

Tech Stack: HTML, CSS, JavaScript

Pose-coach
AI-Powered Real-Time Posture Detection & Correction System
Built an AI-based posture detection system using computer vision to analyze body alignment in real time. The application uses webcam input to track key body points and provides instant feedback for correcting posture. Designed for fitness enthusiasts and beginners to improve exercise form and reduce injury risk.
Key Features:
- Real-time body tracking using hand & pose detection
- Visual feedback for incorrect posture
- Lightweight and runs directly in browser
- Clean and interactive UI

Tech Stack: Python, OpenCV, MediaPipe, JavaScript

Gesture Puzzle Game
AI-Based Puzzle Game Controlled by Hand Gestures
Created an interactive puzzle game controlled entirely by hand gestures. Users can capture an image, convert it into a puzzle, shuffle pieces, and solve it using real-time hand tracking. This project combines creativity with computer vision for a unique gaming experience.
Key Features:
- Capture image using hand gesture
- Auto puzzle generation
- Shuffle and solve mechanics
- No mouse or keyboard required

Tech Stack: Python, OpenCV, MediaPipe

Fruit Ninja
Hand Gesture Controlled Arcade Game
Developed a gesture-controlled version of the classic Fruit Ninja game using computer vision. Users can slice fruits in real time using hand movements captured via webcam, eliminating the need for a mouse or touch input.
Key Features:
- Hand tracking for gesture-based control
- Real-time slicing mechanics
- Smooth animations and scoring system
- Interactive gameplay experience

Tech Stack: Python, OpenCV, MediaPipe
